PROCESSES** (coccidia, clostridium)

▲ **NO TOXICITY OR
RESIDUES** IN MEAT OR
DERIVED PRODUCTS

soluble
in
water

Period of suppression "0"

EFFECTIVE FOR YOUR ANIMALS, PROFITABLE FOR YOU

COMPLEX SOLUBLE 40%

Complex Soluble 40% contains **cashew oil**, an oil whose use goes beyond its nutritional value, with **antimicrobial, anti-inflammatory and antioxidant properties**.

- ▶ **Oral product, easy to administer dissolved in drinking water.**
- ▶ **Can be used alone or in combination with any other product.**

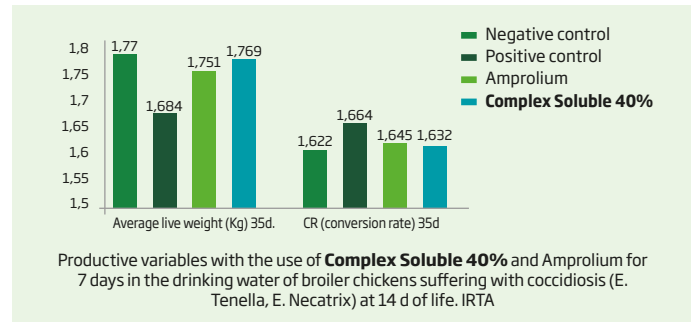

Necrotic enteritis (NE) and coccidiosis, both in clinical and subclinical forms, are two pathologies that act synergistically, affecting not only the health of the birds but also the parameters of uniformity and performance.

In addition, we are currently facing restrictions on the use of antibiotics in animal production, and the need to find viable and effective alternatives.

- ▶ **Complex Soluble 40% represents a new support strategy in cases of enteritis**

The combination of the **antimicrobial and antioxidant power of Complex Soluble 40%**, as well as its **anti-inflammatory properties**, helps control enteritis and enhances the animals' productive performance.

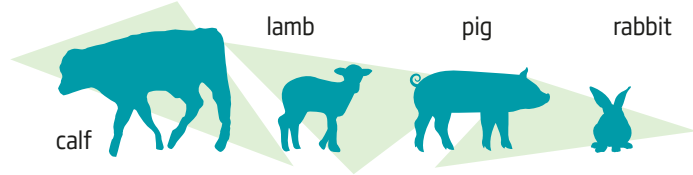

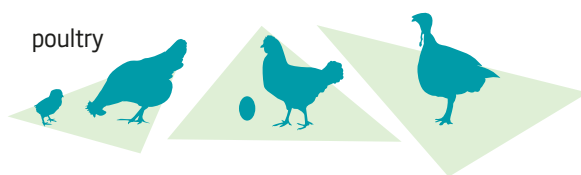

▶ **COMPLEX SOLUBLE 40% IS A NATURAL ALTERNATIVE TO ANTIBIOTICS.**

Complex Soluble 40% proved to be even more effective than Amprolium in animals suffering with coccidiosis achieving a significant improvement in productive performance.

▶ **THE INTEGRITY OF THE INTESTINAL MUCOUS MEMBRANE IS FUNDAMENTAL FOR ENSURING AN OPTIMAL ABSORPTION OF THE NECESSARY NUTRIENTS.**

TARGET SPECIES

DIRECTIONS FOR USE

Administer: 0.5 - 2 L per 1,000 L of water based on the daily consumption of the batch.
