

# NEUMOSAN COMPLEX

MICROENCAPSULATED AND SLOW-RELEASE

## THE NATURAL ALTERNATIVE FOR SUPPORTING RESPIRATORY PROBLEMS

SYNERGISTIC BLEND  
OF NATURAL SUBSTANCES

- ▲ No toxicity or residues in meat or derived products
- ▲ Can be used alone or in combination with any other product
- ▲ Period of suppression 0

**EFFECTIVE FOR YOUR ANIMALS, PROFITABLE FOR YOU**

# NEUMOSAN COMPLEX

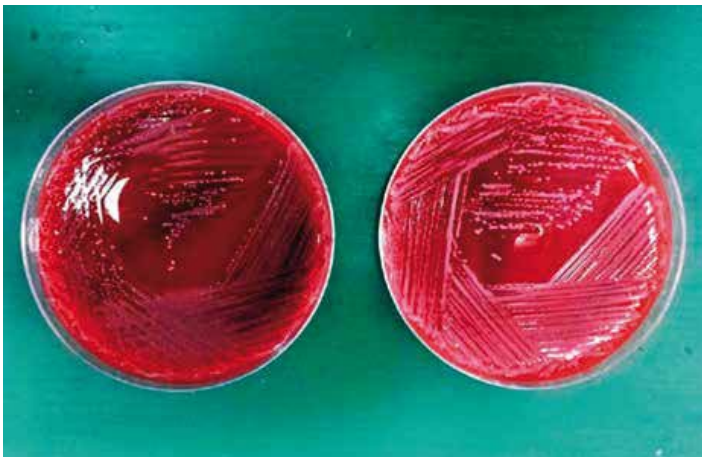

MICROENCAPSULATED AND SLOW-RELEASE

**NEUMOSAN COMPLEX** is a product made from essential oils protected by a lipid cover of plant origin, which prevents the loss of the product due to environmental factors, which protects them from degradation in the rumen and favours its release on a continuous basis.

**Neumosan complex** is a natural product that can be used alone or in combination with antibiotic therapy, contributing to reducing the incidence of respiratory processes, caused by bacteria and viruses.

The antimicrobial activity of its components is scientifically proven, making Neumosan Complex a natural alternative for reducing the use of antibiotics.

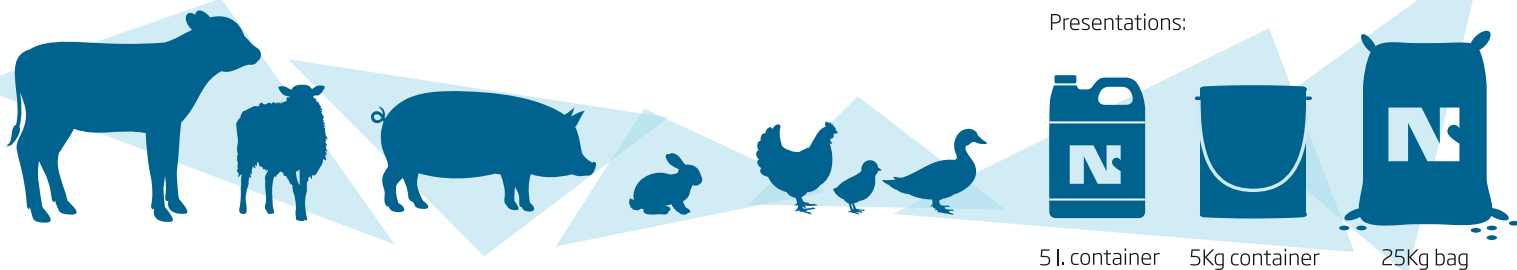

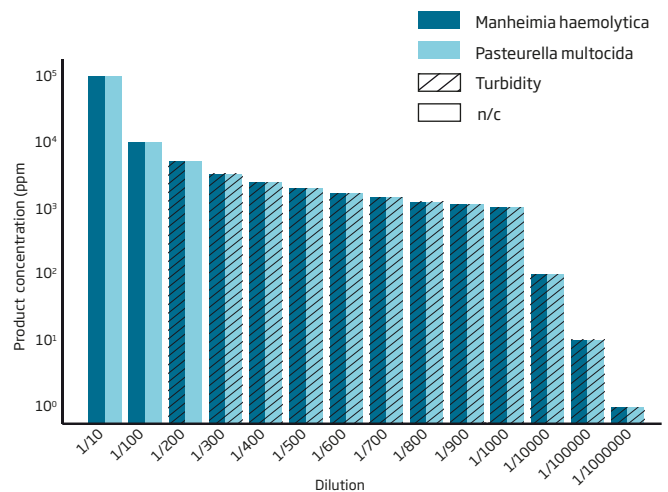

## Determination of MBC

MBC *Pasteurella multocida* = 1/200

MBC *Manheimia haemolytica* = 1/100

## Determination of MIC based on turbidity

**DIRECTIONS FOR USE - POWDER**  
300 - 800 g/t feed

**DIRECTIONS FOR USE - LIQUID**  
200 - 250 ml per 1,000 liters of drinking water

Veterinarians and Nutritionists  
experts in dairy ruminants
